

CyberMed EHR

Electronic Health Information Export [170.315(b) (10)]

CyberMed EHR is compliant with §170.315(b) (10) Electronic Health Information Export by generating C-CDA 2.1 electronic documents. The HL7 Consolidated Clinical Document Architecture (C-CDA) is an XML-based markup standard that provides a library of CDA-formatted documents. This document outlines how to use CyberMed to export patient records compliant with 170.315(b) (10).

The full documentation of the C-CDA format is available from the following location: https://www.hl7.org/implement/standards/product_brief.cfm?product_id=44

Rights Management to Generate C-CDA:

Rights must be assigned to generate C-CDA from a facility “admin” account from Control Panel > Security Configuration > Edit User > Click the selected user to see the role assignment as shown in the screenshot below:

The screenshot displays the user management interface. At the top, there are three tabs: "User List" (selected), "Add New User", and "ASP Membership Management". Below the tabs are four buttons: "< Back", "Unlock User", "Reset Password", and "Deactivate User".

The "User Basic Info" section lists the following fields with their corresponding values:

User Name	A
Active User	
Is Locked Out	(
Is Online	(
Creation Date	2
Last Activity Date	1
Last Login Date	1
Last Password Changed Date	5

The "User Role Setup" section shows the following role assignments:

<input checked="" type="checkbox"/> Admin	<input type="checkbox"/> MA	<input checked="" type="checkbox"/> Reports
<input checked="" type="checkbox"/> Billing	<input type="checkbox"/> MR	<input type="checkbox"/> RW

The "Admin" checkbox is highlighted with a yellow circle.

After a user with “admin” rights login successfully, user can go to Control Panel > Misc > Export Summary to generate C-CDA file as shown in the screenshot below:

Single Account Multiple Accounts Schedule Data Export FTP

Account: SUPPORT Create Copy of Clinical Document

Upload CCD/CCR XML File: Choose File No file chosen Load File

View XML with Layout Save to Local

XML Text XML Validation

Single Patient Electronic Health Information Export:

A single patient export can be achieved by using CyberMed EHR and navigating to Control Panel > Misc > Export Summary > Select “single account” Tab > enter account # > Click “Create Copy of Clinical Document” button as shown in the screenshot below:

Single Account Multiple Accounts Schedule Data Export FTP

Account: 13057 Create Copy of Clinical Document

Upload CCD/CCR XML File: Choose File No file chosen Load File

View XML with Layout Save to Local

XML Text XML Validation
